

Buoy batteries

Alkaline

Reliable

Recycable

Built-in lifting eye/strap

NavigationsTeknik AB has manufactured alkaline buoy batteries for over 30 years time and has delivered tens of thousands to customers mainly in Northern Europe. We have our own in-house production facility and therefore we can deliver fast and still be able to meet special requirements regarding cables and contacts. Batteries are made out of alkaline cells and are free from mercury and lead. The components of the buoy batteries can be recycled. All models comes as standard with short-circuit protection, cables and lifting eye/strap.

Buoy batteries are foremost used in applications where regular solar panels cannot be fitted due to rough climate or high consumption.

We have listed the most common buoy batteries, but we can manufacture other sizes upon request.

Standard rubber cable of 5 m if nothing else is stated.

Model	Connection	Voltage	Ah	Dia (mm)	Length (mm)	Weight
AL 9-18	Rubber cable	18 v	74	90	760	7
AL 11-18	Rubber cable	18 v	130	110	760	12
AL 14-18	Rubber cable	18 v	200	140	760	20
AL 16-18	Rubber cable	18 v	260	160	760	30
AL 20-18	Rubber cable	18 v	420	200	760	40
AL 20-18k	Rubber cable	18 v	200	200	400	20
AL 14-18 duplex	Rubber cable	18 v	400	140	1500	40
AL 14-24	Rubber cable	24 v	200	140	1000	27
AL 14-21	Rubber cable	21 v	200	140	850	24
AL 25-18	Screwterminals	18 v	720	250	850	65
